

KLIX VPN

Secure Remote Access

Klix Konnect Secure Remote VPN

Securely connects mobile users to your headquarters

A corporate VPN extends a corporate network through encrypted connections made over the Internet. Because the traffic is encrypted between the device and the network, traffic remains private as it travels. An employee can work outside the office and still securely connect to the corporate network. Even smartphones and tablets can connect through a VPN.

Automatic Installation:

The complete client installation is done within minutes – no configuration required by users

Broad OS Support: Major OS clients are supported, including Linux, OS X, Android, iOS, WinOS

One-Click VPN: Simply connect to your headquarter with a single click/touch from your device

Strong Encryption: Supports state-of-the-art algorithms like Noise protocol framework, Curve25519, ChaCha20, Poly1305, BLAKE2, SipHash24, HKDF, and secure trusted constructions.

Secure Authentication: Supports **Asymmetric Key-Based Encryption** and offers advanced protection against illegal access

Universal Access: Universally deploy Klix VPN clients anytime, anywhere, securing access to corporate networks.

The Power of Klix Konnect Secure

Unlimited Bandwidth

Since we are providing you with your own VPN Box, you won't have any restrictive bandwidth limits compared to personal VPN solution.

Simple & Cost Effective

Unlike other VPNs for business, our product eliminates the cost of expensive hardware installation and annual fee. We only charge one-time implementation fee and affordable VPN Box.

High Scalability

Easily expand your network on-premise deployment

Reduced Latency

Deploy Klix VPN Box in your office to keep employees close to your network and maintain optimal transfer speed

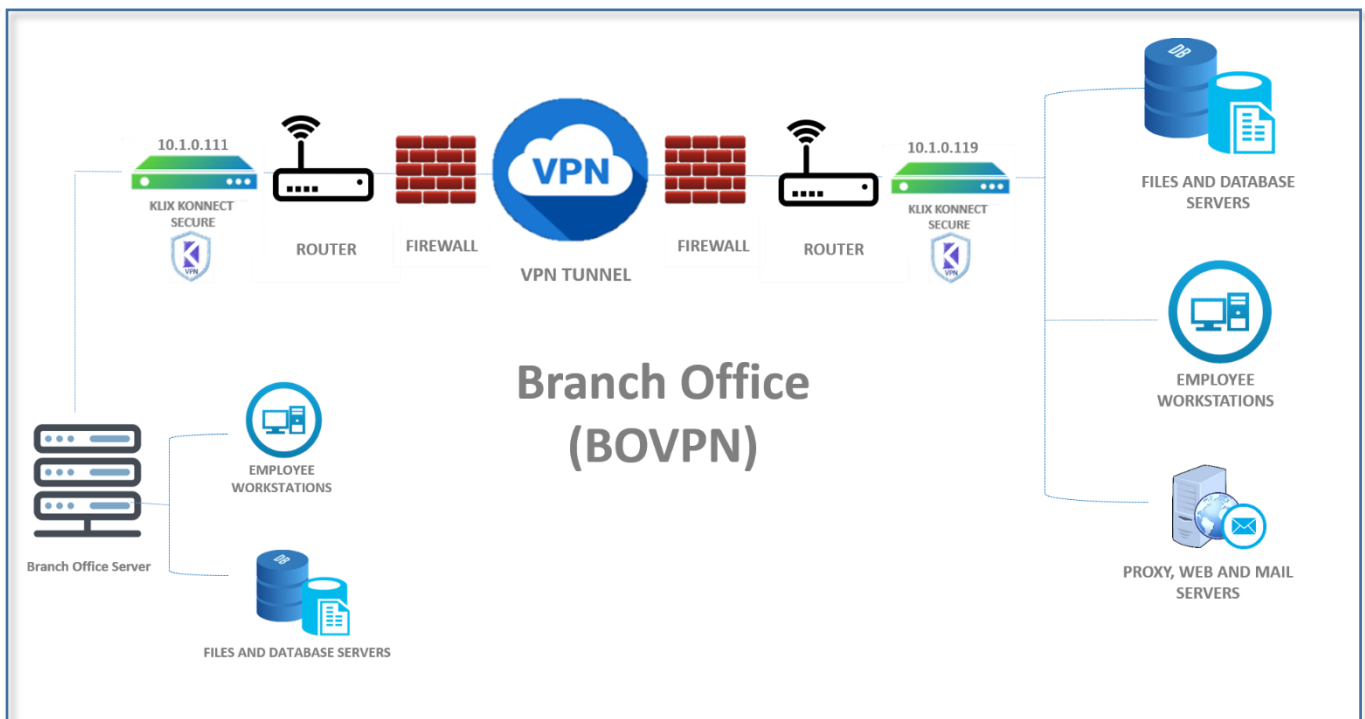

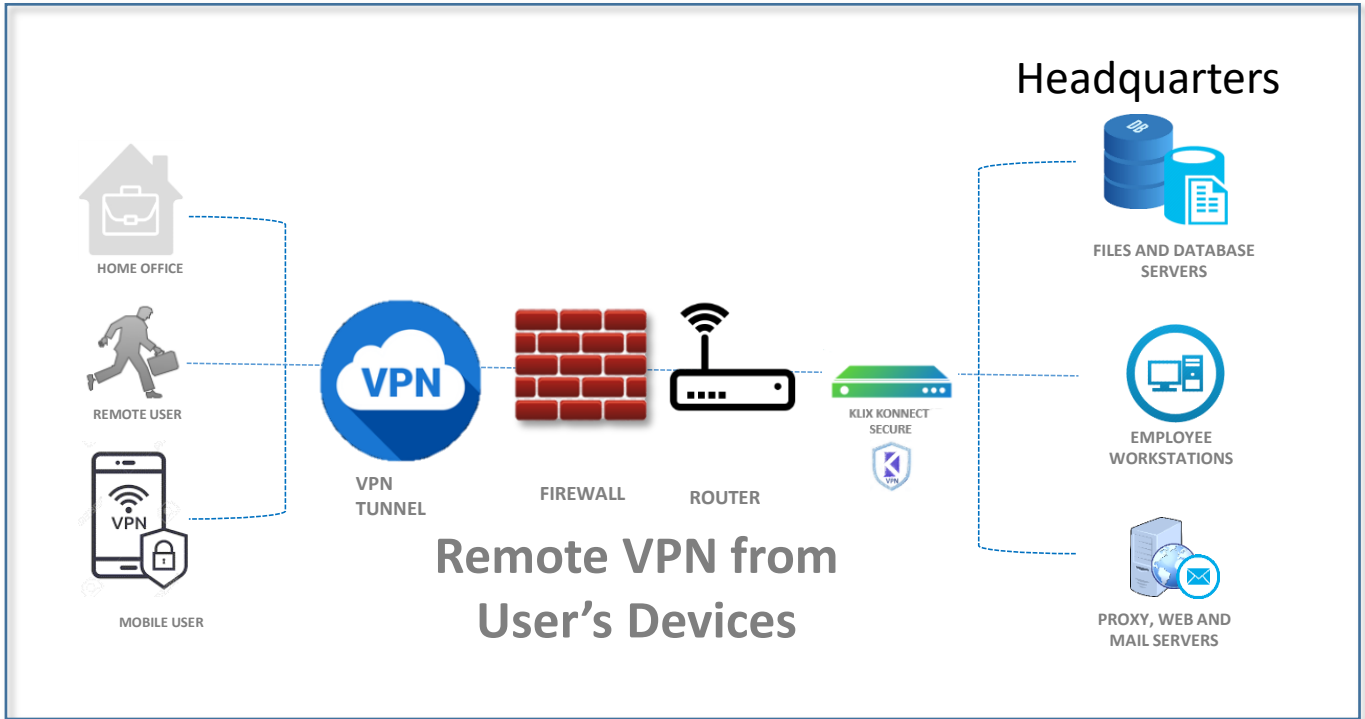

Features

- ✓ **Secure and streamline access** to office network and data Center apps and resources – anywhere, anytime – from device of choice
- ✓ **Rapid implementation** – readily procure and deploy in NUC (Next Unit Computing)
- ✓ **Clientless access** – access web applications and virtual desktops with nothing to install *
- ✓ **Group policy** – integrated with directory services like Active Directory and LDAP
- ✓ **Strong Encryption** – Noise protocol framework, Curve25519, ChaCha20, Poly1305, BLAKE2, SipHash24, HKDF, and secure trusted constructions.
- ✓ **Unified client** – native coverage across multiple OS's for smooth roaming and delightful user experience

* KlixVPN agent must be installed at the physical terminal that is used to access Web application or Virtual Desktop

Klix VPN clients provide easy-to-use and transparent remote access to all company's applications. This is provided through secure Asymmetric Key-Based Encryption from Windows, Linux, Mac OS and UNIX-based systems
